PWGSC completed a seismic investigative survey to ascertain the structural integrity of these Provinci Government buildings.

TPSGC a effectué une étude sismique pour vérifier l'intégrité structurale de ces édifices du gouvernement provincial.

On behalf of Parks Canada, PWGSC undertook the design of an extensive animal protection system tha includes a combination of fencing, underpasses and overpasses. The overpasses are the first of their kind and involved extensive consultation with wildlife experts, environmentalists and designers. They provide safe passage for bear, wolves, deer and elk and are situated at known crossing points for thes animals.

TPSGC a conçu, pour le compte de Parcs Canada, un important système de protection des animaux qu comprend des clôtures, des passages inférieurs et des passerelles. Ces dernières sont les premières de leur genre, et leur construction a nécessité de longues consultations auprès d'experts des animaux sauvages, d'écologistes et de concepteurs. Situées aux points d'intersection connus, les passerelles permettent aux ours, aux loups, aux chevreuils et aux wapitis de traverser la route en toute sécurité.

PWGSC designed and built an Air Traffic Control Tower for NAV Canada and the Greater Toronto Airport Authority. Although the new control tower opened in 1999, the official opening ceremonies were held i the summer of 2000. The largest of its kind in Canada, it was necessary to accommodate the ongoing expansion of Canada's largest and busiest airport. Planned and built at a cost of $17.2 million, the tow is strategically located in the centre of all runways and is 65.4 metres high and provides 360 degree visibility.

TPSGC a conçu et construit une tour de contrôle de la circulation aérienne pour NAV Canada et l'Autori aéroportuaire du Grand Toronto. La nouvelle tour a commencé ses opérations en 1999, mais ce n'est qu'à l'été 2000 qu'ont eu lieu les cérémonies d'inauguration officielles. Plus grosse en son genre au Canada, la tour doit répondre aux besoins toujours grandissants du plus gros et plus achalandé aéropo canadien. Construite à un coût de 17,2 M$, la tour est située de façon stratégique au centre de toutes les pistes. Elle mesure 65,4 mètres et offre une vision à 360 degrés.

Canada Olympic Park was built in 1988 for the Winter Olympic games in Calgary, Alberta. This park is an example of the high profile nature and diversity of projects in which PWGSC is involved. The Calgar Olympic Development Association, a municipal organization, currently manages the Park.

Le Parc Olympique Canada a été construit en 1988 pour les Jeux olympiques d'hiver de Calgary. Ce pa constitue un bel exemple de l'envergure et de la diversité des projets auxquels participe TPSGC. Aujourd'hui, l'Association de développement olympique de Calgary, un organisme municipal, assure la gestion du Parc.

This is the North Magazine of the Citadel Hill fort in Halifax. The magazine was renovated in 1995 to ad as a facility for meetings and receptions. There are three rooms – the Garrison room, the Naval room and the Artillery room. A kitchen was also added to the North Magazine for catering purposes. The fort itself, constructed from granite and red brick, was built between 1828 and 1856 and rebuilt in the early 1900s.

Voici la Poudrière nord de la Citadelle-d'Halifax. En 1995, la Poudrière fut restaurée pour devenir un centre de conférences et de réceptions. Il y a trois salles : la Salle de la garnison, la Salle de la marine et la Salle de l'artillerie. Une cuisine a également été ajoutée pour offrir des services de traiteur. Construit entre 1828 et 1856 puis reconstruit au début des années 1900, le fort est en granit et en briques rouges.
